Release: Immediate

### ***KEC Offers Fridge Recycling Rebate*** *You'd be shocked how much your old fridge is eating!*

Kootenai Electric members: receive a \$30 rebate for recycling your old refrigerator or freezer! Save energy, save some money and help the environment. A single older refrigerator actually does as much damage to the environment as two cars can do in a year. What's more, older appliances can use three to four times more electricity than new models, eating up hundreds of dollars a year in utility bills. So give us a call and recycle that old fridge or freezer. We'll pick it up for free, plus you'll get \$30.

To schedule a pick up call 877-577-0510 or visit [www.kec.com](http://www.kec.com).

\*Must be a KEC member. Refrigerators and freezers must be in clean, working condition and must be a minimum of 10 cubic feet in size, utilizing inside measurements. KEC contracts with JACO Environmental, an appliance recycler, to pick up and recycle refrigerators and freezers. This program is funded by KEC and is available to its single family residential members on a first-come, first-served basis until funding is expended. Members must own the unit(s) being recycled. Limit two units per residential address. A check will be mailed to the KEC member within 4-6 weeks after the appliance collection.
